CARLOS VINICIUS

Mid-Level Frontend Developer

Aracaju, SE — Brazil | +55 (82) 98122-9049 | skittz.dev@gmail.com | linkedin.com/in/carlos-vinicius-dev | github.com/Skitttz | portfolio.skittz.dev

PROFESSIONAL SUMMARY

Mid-Level Frontend Developer specialized in **Next.js, React.js, TypeScript** and **Tailwind CSS**, with a strong foundation in UX/UI. Experienced in corporate design systems, automated testing, component libraries, and CI/CD pipelines. Driven by technical challenges and innovation, focused on delivering high-performance digital experiences and scalable code.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Storybook

Backend & Databases: Node.js, Strapi, PostgreSQL, JWT, REST APIs

Testing & QA: Playwright (E2E), Jest, React Testing Library

DevOps & Tools: Docker, Docker Compose, CI/CD, Git, Figma, HTTPie, Bruno, Google Analytics

Methodologies: Scrum, Kanban, Agile, Waterfall

UX/UI & Performance: Design Systems, Core Web Vitals, SEO On-Page, WCAG 2.1 AA, Accessibility

PROFESSIONAL EXPERIENCE

Mid-Level Frontend Developer

WeFit | São Paulo, SP (Remote) *Nov. 2024 – Present*

- Conducted implementation of an **E2E testing suite with Playwright** integrated into the client infrastructure, reducing the QA validation cycle from **4h to 1h20min — 66% reduction**
- Collaborated in building internal libraries with **Render Props, Compound Components** and **Custom Hooks** patterns, reducing code duplication by **40%**
- Expanded the component library documented in **Storybook** with stories, variations, and use cases, increasing component coverage by **10%** and reducing implementation rework
- Managed **CI/CD pipeline** troubleshooting, diagnosing and resolving failures to ensure continuous integration stability
- Implemented corporate **design systems** defined by the Design/UX team across **8+ applications** for banking, insurance, and healthcare, translating specifications into reusable components and reducing interface inconsistencies by **85%**
- Operated in an **Agile** environment with **Scrum** and **Kanban**, participating in sprints, dailies, planning, and retrospectives, alongside projects using **Waterfall** methodology for fixed-scope deliveries

Stack: Next.js, Vite, React.js, TypeScript, Tailwind CSS v4, Playwright, Jest, Docker, Git, HTTPie, Figma

Junior Fullstack Developer

SergipeTec | Aracaju, SE (On-site) *Oct. 2023 – Oct. 2024*

- Architected a full-stack institutional portal with a file management system and **JWT authentication**, supporting **200+ simultaneous users** with response times under **200ms**
- Produced complete architectural technical documentation using **C4 Model** (Context, Container, Component, Code), establishing standards that facilitated system maintenance and evolution
- Automated legacy data migration with **Node.js** scripts for web scraping, processing **200+ records** with integrity validation, eliminating **50h of manual work** and reducing error rate from **12% to less than 0.5%**
- Applied containerization with **Docker** (Docker Compose, multi-stage builds), reducing environment setup from 4h to 1h30min — **62.5% reduction** — and eliminating **95%** of compatibility issues

Stack: Next.js, React.js, TypeScript, Node.js, Strapi, Docker, PostgreSQL, Tailwind CSS v3, Git, Bruno, Figma

Freelance Frontend Developer

Self-employed | Brazil (Remote) *Jan. 2023 – Sep. 2023*

- Built **8+ custom landing pages** for law firms and consulting companies, applying UX/UI optimizations and conversion-focused copywriting
- Led **SEO on-page** optimization, **Core Web Vitals** improvements, and **WCAG 2.1 AA** compliance, boosting indexing, performance, and search engine ranking
- Managed direct client relationships from requirements gathering through final delivery, maintaining high satisfaction rates and securing recurring contracts

Stack: React.js, JavaScript (ES6+), HTML5, CSS3, Git, Figma, Google Analytics, Google Search Console

FEATURED PERSONAL PROJECTS

Nights4Films — Movie Catalog Platform

- Structured a profile management system with personalized preferences and viewing history, reducing onboarding friction by **3 steps**
- Built a 5-star rating system, text reviews, and customizable lists (favorites, watchlist, watched) with advanced filters, supporting **5+ interaction types per item**
- Optimized performance with **lazy loading, code splitting, React.memo** and **virtualization**, achieving **Lighthouse score 94+ (Performance), FCP < 1.2s** and **TTI < 2.8s**

Stack: React.js, React Query, Tailwind CSS, Node.js, Strapi, PostgreSQL, Git

Cats — Social Network for Cat Lovers

- Developed an infinite feed with **virtual scrolling** and nested likes and comments system with state management via **Context API**, reducing memory consumption by **70%** vs. traditional rendering
- Integrated **real-time chat** with **Socket.io** using **WebSocket** protocol, implementing rooms, persistent history, and online presence indicators with bidirectional real-time communication
- Architected authentication and user session flow with **Context API**, an approach suited to the application scope since heavy asynchronous state was handled via **React Query** with cache, synchronization, and automatic data revalidation
- Structured automated moderation with **TensorFlow.js COCO-SSD** for object detection and **Machine Learning**, validating cat presence with **95% accuracy** and reducing manual moderation workload by **80%**

Stack: React.js, React Query, Node.js, Socket.io, TensorFlow.js, Headless WordPress, PostgreSQL, Git

EDUCATION

Bachelor's Degree in Computer Science — Universidade Tiradentes (UNIT)

MBA in Full Stack Development — Rocketseat + Sirius (360h) *2024*

CERTIFICATIONS

Advanced UI Design — Origamid (44h) *2023*

UX Design and Usability Heuristics — Origamid (32h) *2023*

LANGUAGES

Portuguese: Native | **English:** Technical — fluent reading of documentation and proficient written communication
